USB Charging

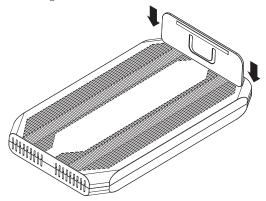

To charge your USB devices, simply connect the included external power supply between the U280-010-ST-CEE and a power source, then plug your devices into the available ports. A single port provides a maximum of 5V 2.4A of power.

Note: In the event that more power is being pulled than the U280-010-ST-CEE can provide, the unit's over-current protection will cause the USB ports to cycle on and off, preventing any of the connected devices from being charged. If this occurs, reduce the load by removing devices until the total load comes within the supported range.

Removable Storage Brackets

Customize the unit's storage space according to the number and size of devices being charged. To install, simply insert a storage bracket into the desired slots.
